Athermal Green Welding Lenses

Our Athermal Green/Gray Welding Lenses are of the highest quality glass, made by Schott Glass in Germany. This glass is unlike the Chinese glass on the market today; it has none of the distortions, color variations, striations, bubbles or inclusions that are prevalent in most Chinese welding glass lenses. It offers excellent UV and IR protection while reducing eye strain from its lack of distortion. Available in shades 4-14.

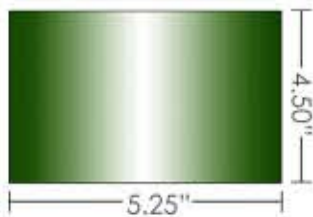

Welding Lens -- Small 2 x 4.25

Size: Small Dimensions: 2 x 4.25
Athermal Green
Shades Available: 10,11,12 or 14.

GREEN SHADE 10 WLD-S10-WFS	GREEN SHADE 11 WLD-S11-WFS
GREEN SHADE 12 WLD-S12-WFS	GREEN SHADE 14 WLD-S14-WFS

Welding Lens -- Large 4.5 x 5.25

Size: Large Dimensions: 4.5 x 5.25
Athermal Green
Shades Available: 10,11,12 or 14.

GREEN SHADE 10 WLD-S10-WFL	GREEN SHADE 11 WLD-S11-WFL
GREEN SHADE 12 WLD-S12-WFL	GREEN SHADE 14 WLD-S14-WFL

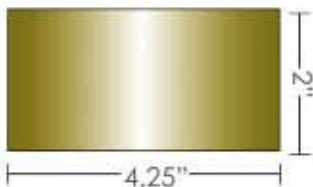

Welding Lens -- Round 50mm

Shape: Circular Diameter: 50 mm
Athermal Green
Shades Available: 4,5,6,8 or 10.

GREEN SHADE 5 WLD-S5-WFC	GREEN SHADE 6 WLD-S6-WFC
GREEN SHADE 8 WLD-S8-WFC	GREEN SHADE 10 WLD-S10-WFC

Gold Coated Welding Lenses

This internationally approved welding filter offers excellent protection featuring high optical quality, dimensional stability, resistance to radiation, and scratch resistance. The gold mirror coating reflects 90% of infrared radiation (radiated heat) and reduces the heat to which the eyes are exposed.

Small: 2" x 4.25"

Clip-on, Half-Eye Welding Safety Glasses

The Clip-On Flip-Up Spectacles are available in half- and full-eye filter lenses in all welders' shades. They easily fit on safety glasses for a comfortable adaptation of the glasses for uses with welding, torching, metal cutting, and observation of molten metals.

Hard Hat Half-Eye Welding Safety Glasses

This series of Clip-On Flip-Ups is designed to fit onto any hard hat or bump cap brim, and is worn in conjunction with your existing protective eyewear. They quickly flip down to enhance your vision and then flip back up when not needed. This series features an integral spring clip for secure mounting without screws or fasteners. They are available with your choice of replaceable half- or full-filter lenses.

AlloWeld Welding Lenses

AlloWeld aluminum glass welding lenses are used for welding and brazing aluminum, cast iron and stainless steel. These lenses eliminate all sodium flare while welding and are excellent for working on aircrafts, race cars, boats, radiators, and refrigeration units. The rare Earth elements found in AlloWeld increase color contrast so you can better determine puddling and temperature of the material you are working with. AlloWeld is made from high-quality, distortion-free German glass which offers the great scratch resistance and durability that comes with all glass lenses. AlloWeld meets the same ANSI welding lens standards but the lens color is of a dark emerald green and is offered in shade 4, 5, 6 and 8.

Custom Green Athemal IR

We fabricate custom Green IR glass sheets for use in welding windows, port holes for automated welding or glory hole observation. We can custom cut any size sheet up to 30"x72" in size. Available in shades 4, 5, 6, 8, 10, 11, 12, 14 and 15. Lighter shades available by special order from the factory.

Quote - Custom Welding Window Sheeting

If you would like to receive a quote on any sheet glass, contact Ryan Phillips at 888-440-9797 ext. 11 or email Ryan@phillips-safety.com. In order for us to quote your project, please be sure to have the following information ready when you call:
